DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 24-28 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 24, there is no antecedent basis for "said . . . retention members."

Regarding claim 28, there is no antecedent basis for "said retention members."

Regarding claim 31, there is no antecedent basis for "the male connection portions."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4-7, 9-17, 19-28 and 30-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Callahan et al. (4,693,026).

Callahan discloses a housing 10 having an opening; a light source 27 positioned inside the housing; and a display module for an illuminated display device, the display module comprising a flexible, at least substantially translucent sheet 29. This sheet is non-self-supporting, in that it is supported by a frame. Callahan further discloses a plurality of spaced apart, horizontally disposed divider members 41 positioned on one side of the sheet and each of

the divider members being a retaining structure **41b** on each of the divider members for retaining portions of display members **19** in a predetermined position; each of the divider members held in place over the sheet by a corresponding one of a plurality of retention members (i.e., the bolts shown in Fig. 3), secured over the sheet in fixed relation on a side of the sheet opposite to the side on which the divider members are located; a plurality of display members **19** positioned between spaced apart sets of the divider members, the display members having translucent portions **39**.

Regarding claim 4, part **41b** constitutes a rib.

Regarding claims 5, 10 and 19, the screws shown in Fig. 3 comprise a male bolt and a female nut.

Regarding claim 7, the display members disclosed by Callahan are "thin plastic panels" (col. 3, line 65). Such panels will inherently have some flexibility.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 18 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Callahan et al. (4,693,026) in view of Bailey (5,065,537).

Callahan discloses the invention substantially as claimed, as set forth above. However, the sheet is translucent rather than transparent. Bailey teaches that it was known in the art to make such a panel transparent (col. 4, lines 7-12). It would have been obvious to one having

ordinary skill in the art at the time the invention was made to make the panel disclosed by Callahan transparent, as taught by Bailey, in order to allow more light to shine through the sign.

Allowable Subject Matter

7. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
